The number of training days and content of sessions greatly depends on the number of instruments that will be administered (EGRA plus other questionnaires, or in multiple languages), the number of assessors to train, and their level of experience. If assessors will learn to administer EGRA in 2 languages, more time will need to be spent training them on EGRA. As a result, it is recommended that the number of school visits be reduced to 2, to provide more time during the workshop for them to learn the instrument.
